Funded by the Texas Higher Education Coordinating Board, the **STEM Collaborative for Teacher Professional Learning** is a partnership between the College of Education and Human Development, the College of Engineering, and the College of Science at Texas A&M University.

**Now recruiting**

**Texas STEM Teachers!**

Are you a STEM teacher?

Do you teach one or more periods of science or mathematics?

OR

Do you teach one or more periods of technology? Computers? Robotics? CATE?

If you can answer yes to any of these questions, the STEM Collaborative for Teacher Professional Learning wants YOU!

Offering two flexible professional learning opportunities focusing on STEM:

**Individual option: Professional certificate in STEM teaching**
- Enhance your proficiency in identifying and solving complex curriculum problems in STEM-related subjects and your capacity for campus or district leadership in STEM
- Provided through an online environment
- Seeks individuals who have a strong desire to become campus or district leaders in STEM

**Team option: STEM teacher professional learning network**
- Receive on-going support for highly effective teaching strategies, collaboration among STEM educators, and explicit integration of the Texas College and Career Readiness Standards (CCRS)
- Receive peer support/mentoring through collaboration with other STEM teachers
- Provided through face-to-face (4-day summer institute) interaction and an online environment
- Seeks teams of 3 educators from the same school or district who have a strong desire to increase student achievement in STEM subjects

**Benefits of participation:**
- $1000 stipend to support your commitment to excellence in STEM teaching
- Opportunities for professional learning based on best practices related to STEM education
- Access to research-based resources that promote STEM learning and support CCRS
- Assistance and support in the development and implementation of highly effective STEM teaching strategies
